Salman Bashir

Senior Software Engineer | Full Stack Developer | AI Integration

Lahore, Pakistan | +92 313 7713795 | salmanbashir163@gmail.com | linkedin.com/in/salman-bashir-a49021171 | salmanbashir.tech

PROFESSIONAL SUMMARY

Senior Software Engineer and Full Stack Developer with nearly 5 years of experience building web applications end to end with React, Next.js, TypeScript, Node.js, Express.js and NestJS. Specializes in AI integration, including natural-language-to-SQL and retrieval augmented generation (RAG) using OpenAI, Anthropic and self-hosted LLMs. Built an embeddable AI assistant for real-estate agents and LLM features for a hospitality platform. Has delivered products across real estate, hospitality, CRM, recruitment and billing, some as the sole developer.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Ruby, SQL, HTML, CSS

Frontend: React, Next.js, AngularJS, Redux, Tailwind CSS, Material UI, Ant Design, Bootstrap, Formik, jQuery, Recharts, Three.js, React Three Fiber

Backend: Node.js, Express.js, NestJS, FastAPI, Pydantic, SQLAlchemy, Ruby on Rails, Django, REST APIs, Microservices, Swagger

Databases: MySQL, MariaDB, PostgreSQL, MongoDB, Firebase, Google Cloud Firestore, Vector Databases

AI and LLM Integration: LLM Integration, OpenAI API, Anthropic API, Ollama (self-hosted LLMs such as Qwen 2.5), Retrieval Augmented Generation (RAG), Vector Search, Natural-Language-to-SQL, Semantic Layer, SQL Validation (sqlglot)

Cloud and Integrations: AWS (S3), Azure Service Bus, Oracle OHIP (POS and PMS), Xero API, Algolia, Google Maps API, Intercom, Amplitude, Twilio

Tools: Git, GitHub, GitLab, Docker, Docker Compose, Jira, Postman

PROFESSIONAL EXPERIENCE

Nextbridge Limited | Lahore, Pakistan — Apr 2022 – Present

Senior Software Engineer

Promoted from Software Engineer

- Build and maintain full-stack client applications in React, Next.js, Node.js, Express.js and NestJS, covering new modules, third-party integrations, bug fixes and production support.
- Own AI and LLM integration across products, connecting OpenAI, Anthropic and self-hosted Ollama models to real-estate, hospitality and data analytics platforms.
- Deliver complete products as the sole developer, including the Grace AI assistant, taking features from planning and implementation through release.
- Work with clients and product owners to understand requirements, break them into tasks and agree on delivery timelines.
- Plan and track work in Jira, and take part in sprint planning, daily stand-ups and sprint reviews with client-facing project teams.
- Review teammates' code, guide junior developers on clean, maintainable code, and work with QA and design teams to keep releases stable.

Software Engineer

Promoted from Associate Software Engineer

- Delivered full-stack features in React, Redux, Node.js and Express.js for client platforms, including the APC CRM revamp and the Abu Dhabi Global Management rental platform.
- Rebuilt the existing APC CRM on a modern stack, implemented its Xero accounting integration and worked on the MySQL data layer behind it.
- Owned the frontend services for the Abu Dhabi Global Management client and admin portals and connected them to Java and .NET Core backend microservices, delivering features and fixing issues across the stack.
- Took part in requirement discussions with clients, and estimated and planned features with the team.
- Tracked bugs and client issues in Jira, resolved them across the stack, and worked with QA to test features before release.

Associate Software Engineer

Promoted from Trainee Software Engineer

- Worked full stack as the sole developer on the NextDesk Ruby on Rails help desk, adding features to existing modules, optimizing the application and improving the UI.
- Built a REST API for the NextDesk mobile app, rake tasks that import data from other systems, email notifications for resolved tickets, a view-only admin role across departments and a manager option to stop team emails.
- Delivered NexTalent recruitment features on React, Node.js, Express.js and MongoDB, including the interview scheduling roster, job and employee sections, dynamic Formik forms, validations and AWS S3 file uploads.
- Built the Group Captain frontend in React and TypeScript (dashboard, timesheets, end-of-day reports, attendance) and components such as the meal scheduling roster for the Meals App (an employee meal-ordering app with React Native mobile apps and an admin portal), connecting both to backend APIs.
- Joined sprint planning and daily stand-ups, followed team coding standards and worked through code review feedback.

Trainee Software Engineer

- Worked across the full Ruby on Rails stack on client projects, including Outdoor Sports Connection, National Career Fairs and Open Source Billing.
- Built user listing sections, fixed frontend and backend bugs, resolved PDF generation and Twilio SMS campaign issues, and worked on invoice PDF templates.
- Used Git and Jira in the team's daily workflow and learned the team's standards for code review and delivery.

KEY PROJECTS

Better Homes | *Real-estate platform for a Dubai brokerage, used by buyers, investors and agents*

- Developed the leads, listings, deals, communities, properties and customer-calling modules.
- Added AI services to the core products to help agents reach more customers.
- Applied Next.js server-side rendering (SSR), static site generation (SSG) and routing to make listing pages search-engine friendly and fast to load.
- Worked with the platform's Algolia search, Intercom, Amplitude and Google Maps integrations.

Tech: Next.js, NestJS, React, Ant Design, AWS, Anthropic API, FastAPI

Grace AI | *AI assistant for Better Homes agents, delivered as a standalone app and an embeddable script*

- Built the full application as the sole developer, connecting the AI team's models from the backend to the user interface.
- Ensured reliable AI responses in the standalone app and every embedded version, and led the script's rollout across multiple Better Homes websites with consistent performance.

Tech: React, Tailwind CSS, Node.js, Express.js

Ring N Bring | *Hospitality platform for QR code ordering, payments and venue operations in restaurants and hotels*

- Built and maintained the NestJS backend services that connect the platform to Oracle OHIP POS and PMS systems, adding new features and keeping data exchange with venue systems reliable.
- Integrated the OpenAI and Anthropic APIs to add AI features that support sales.

Tech: NestJS, MySQL, MongoDB, Azure Service Bus, Firebase, OpenAI API, Anthropic API

AskBase AI | *SaaS platform for analyzing business data through natural-language questions*

- Delivered the full flow: a Next.js 15 and React 19 interface, a FastAPI backend and the AskBase natural-language-to-query engine in Python.
- Ran local LLMs through Ollama, using Qwen 2.5 Coder to generate SQL and Qwen 2.5 Instruct for conversational answers.
- Connected client databases through async SQLAlchemy (MySQL, MariaDB, PostgreSQL), Motor (MongoDB) and Google Cloud Firestore.
- Made generated queries safe to run on client data by parsing and validating SQL with sqlglot, enforcing read-only access and rate-limiting the API.
- Created results views with Recharts and a 3D chart view with Three.js and React Three Fiber; packaged the API, UI and a demo database with Docker Compose.

Tech: Next.js 15, React 19, TypeScript, Tailwind CSS, Python, FastAPI, Pydantic, SQLAlchemy, sqlglot, Ollama (Qwen 2.5), MySQL, MariaDB, PostgreSQL, MongoDB, Firestore, Docker

Abu Dhabi Global Management | *Real-estate rental platform with client and admin portals*

- Worked full stack, primarily owning the frontend services in React and Redux and connecting them to the backend microservices.
- Delivered features across the client and admin portals and fixed issues across the stack.

Tech: React, Redux, JavaScript, Microservices, Java, .NET Core, MySQL

APC CRM | *Customer relationship management (CRM) platform, revamped on a modern stack*

- Served as a full-stack developer on the revamp of the existing CRM, rebuilding the frontend in React and the backend in Node.js and Express.js.
- Implemented the Xero accounting integration and worked on the MySQL data layer behind the revamped application.

Tech: React, Node.js, Express.js, MySQL, Xero API

NexTalent | *Recruitment and applicant tracking system*

- Built the interview scheduling roster, the job section and the employee details section.
- Implemented dynamic forms with Formik, added missing validations and set up AWS S3 file uploads.

Tech: React, Tailwind CSS, Material UI, Node.js, Express.js, MongoDB, AWS S3

Group Captain | *Project, timesheet and attendance management platform*

- Developed the complete frontend in React and TypeScript, including the dashboard, timesheets, end-of-day reports and attendance, and connected it to the backend APIs.

Tech: React, TypeScript, Node.js, Express.js, MongoDB

NextDesk | *Company help desk and ticketing system*

- Served as the sole developer on the existing Ruby on Rails application, adding features to existing modules, optimizing the application and improving the UI.
- Built an API for the mobile app, rake tasks that import data from other systems, and email notifications when tickets are resolved.
- Added an admin role that can view all departments' tickets without acting on them, and an option for managers to stop emails from their team.

Tech: Ruby on Rails, MySQL, JavaScript, Bootstrap

Meals App | *Employee meal-ordering app with mobile apps and an admin portal*

- Developed frontend components, including the meal scheduling roster, and connected them to the backend APIs.

Tech: React, React Native, Node.js, Express.js, PostgreSQL

Ruby on Rails Projects | *Outdoor Sports Connection, National Career Fairs and Open Source Billing*

- Built user listing sections, fixed frontend and backend bugs, resolved PDF generation and SMS campaign issues, and worked on invoice PDF templates.

Tech: Ruby on Rails, PostgreSQL, MySQL, Twilio, jQuery

EDUCATION

Bachelor of Science in Computer Science | FAST-NUCES (National University of Computer and Emerging Sciences) **2017 – 2021**
